Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 20 is objected to because of the following informalities:

Claim 20 is a repetition of claim 16 from which it depends. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 3, 4, 12, 13, 16, 17, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka et al. (6,863,994). Tanaka et al. discloses in figures 2 and 3A, a sliding member in which a sliding layer 4 is provided on a surface of a base material 2 formed of steel, wherein the sliding layer 4 contains polybenzimidazole and 40 percent by volume of molybdenum disulfide, the surface of the base material is subjected to a chemical conversion coating (Cu bearing alloy) 3, the sliding layer 4 is provided on the chemical conversion coated surface 3, and a bonding layer 11 formed of a thermosetting resin (PAI) is provided between the base material 2 and the sliding layer 4. The sliding member being used for a swash plate of a swash plate type piston pump has been treated as an intended use and not limiting.

Allowable Subject Matter

Claim 5-11, 14, 15, 18, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of three references.

Iwata et al. (20030185475) is cited to show a swash plate with a PBI resin coating.

Tanaka et al. (6,866,421) and Onada et al. (5,531,195) are cited to show sliding members with PBI resin coating containing solid lubricant.
